EVIGILANT OVERVIEW

eVigilant is an established leader in providing innovative, cost-effective, IT and security solutions to our clients. Founded in 1999, we have helped hundreds of organizations secure their facilities and IT systems using cost-effective solutions that meet our client’s needs. eVigilant has been recognized as one of the fastest growing “Inc. 500” list of companies in America and has experienced 200% growth over the last 3 years mainly due to our commitment to quality and service. Much of our business stems from repeat customers who value our commitment to meeting their specific needs and delivering on our promises.

Electronic Security Systems	Physical Access Control Systems (PACS), Intrusion Detection, Surveillance Systems (CCTV), Biometric Technology, Mass Notification, Perimeter Screening, Visitor Management
Cyber Security & Information Assurance	Logical Access Control integration with PACS, Information Assurance, Identity and Access Management, Authorization and Accreditation, IT Governance, FICAM, eSignatures
Systems Integration	COTS Implementation, Single-Sign-On Enterprise Integration, Converging Physical and Logical Access Control
Network Engineering	Network Design, Testing, Implementation and Maintenance, Network Health Assessments and Remediation, Network and Critical Infrastructure Protection, Remote Managed Services
Service Desk Support	Help/Service Desk Support, Application Installs, Maintenance and Refresh, End User Support, Knowledge Base Management, Service Maintenance Contracts on Physical Security Infrastructure
E-Learning & Compliance Training	Learning Management Systems, Content Management Systems, Customized and COTS Training Solutions for Online Courses and Instructor-led Training, Hosted Cloud Solutions
Program & Project Management	Communication Planning, Risk Planning, Earned Value Metrics Setup and Reporting, Project Facilitation Support, Project Rescue Services, Portfolio Management, PMO and PM Center of Excellence Implementation and Management

EVIGILANT AT A GLANCE

eVigilant's IT security services blend mission, people, process, and technology. We implement processes, introduce tools, and mitigate IT risks and vulnerabilities. We have experience in performing all phases of the project accreditation and authorization process to help ensure risks are mitigated on Federal and DoD IT systems. We provide full IT Security program support services including FISMA compliance, policy and procedure writing, and continuous monitoring. eVigilant can help clients implement the Federal Identity, Credential, and Access Management (FICAM) and HSPD-12 guidelines. eVigilant is a leader in helping integrate physical access control systems with logical access control solutions that enable use of smart ID cards to effectively control access to both building facilities and IT systems. We have proven solutions for your e-authentication, encryption, and e-signature requirements.

PROGRAM AND PROJECT MANAGEMENT

eVigilant has a team of highly skilled, experienced, and certified project management professionals that can help you manage your projects, and ensure they are delivered on time, within budget and scope. We are experts at helping mitigate and managing risks. The key to our success is our pro-active approach that helps ensure timely, effective communication, risk mitigation, performance measurement, and managing stakeholder expectations throughout the project. We also have experts that can help organizations implement, and manage project management offices (PMO) that instill strong and effective control on your IT investments (e.g. expert schedule development and control, earned value management, change management, portfolio management).

SYSTEMS INTEGRATION

eVigilant has been helping enhance and integrate multi-system environments to ensure effective connectivity, communications, and efficiencies at the enterprise level. We have helped with single-sign-on initiatives, embedded new COTS technology to enhance the features and capabilities of existing legacy systems, and built bridges across systems to facilitate data sharing to help improve process workflow and reduce redundancies.

SERVICE DESK SUPPORT

eVigilant has been providing help desk and service maintenance support to many of our clients in both the Government and commercial sectors. We supplement our support by investing in tools to help facilitate effective ticket and incident management through our client user portals, which enable our clients another channel for accessing and obtaining help. Our remote Help Desk provides an efficient way to provide immediate support to our customers. It's convenient and fast. We've found that the vast majority of our customer's technical problems can be resolved remotely.

eVigilant's expertise includes a broad selection of surveillance, building access control, intrusion detection, mass notification, perimeter screening, barriers, gate controls, biometric technology, visitor management systems, and cost-effective hosted managed solutions. eVigilant continuously tests and evaluates the latest technology to provide its customers with the most advanced and reliable solutions for their security needs. We can also provide UL2050 monitoring and certification. eVigilant is solution agnostic and our goal and mission is to diagnose before prescribing the most cost effective solution that fully meets the client's requirements. We have the partnerships with leading manufacturers and our volume of sales helps ensure that we have access to the best volume pricing that gets passed down to our clients.

E-LEARNING AND COMPLIANCE TRAINING

eVigilant will guide our clients on effectively minimizing costs on managing and administering training, while putting an emphasis on adhering to compliance training requirements. We are solution agnostic and are partnered with leading vendors in the e-learning industry and can tailor the right solution for your specific needs. We implement learning management systems, and build custom on-line courseware that adhere to ADA, AICC, and SCORM standards. We can help your organization efficiently and effectively meet your mandatory and compliance training requirements and enable you to maintain a central system of record for all training, certification, and professional development.

NETWORK ENGINEERING

eVigilant's team of highly skilled security engineers takes a holistic approach to reducing security risk postures of networks and intellectual assets. Assessing and mitigating risks, identifying vulnerabilities and helping to mitigate them is our focus. Our network engineering services span from network health assessments and remediation, network design and implementation, network penetration testing, network load testing, and network forensics. We also offer managed services that help maintain your network and help ensure it is secure, and running at peak performance.
